

MORE THAN HALF SECURITY BREACHES

OCCUR DUE TO **THIRD PARTY VENDORS**

- Defend against vendor risks
- Simplify risk management
- Save time and improve efficiency
- Scale up with ease

S2 VENDOR is an intuitive platform that lets you assess and monitor your vendor risk. Track vendor evaluation and utilize powerful metrics to reduce your security risk over time.

INVENTORY

Easily create or import all vendors into one centralized location. Track their security scores and progress.

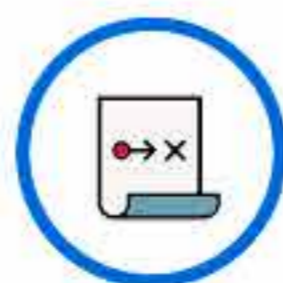

CLASSIFY

Based on a standard series of 10 questions, you will classify the risk posed by each vendor as either a high, medium or low.

ASSESS

Measures the strength of the vendor's security practices across four control areas. The vendor will receive a score for the same.

TREATMENT

Take action against vulnerabilities revealed by the assessment. Track improvements over time for an overall stronger security posture.
